

Californians and Their Government

May 2021

Time Trends – Likely Voters

Methodology Note:

Findings for May 2021 are based on a survey of 1,705 California adult residents, with 75 percent interviewed on cell phones (1,255 interviews) and 25 percent interviewed on landline telephones (450 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. Interviews took an average of 19 minutes to complete. Interviewing took place on weekdays and weekday nights from May 8–19 2021.

The May 2021 sampling error for the 1,074 likely voters, taking design effects from weighting into consideration, is ± 4.2 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
